SUMMARY

Full Stack Developer with 2+ years of experience developing and supporting enterprise applications using Java, Spring Boot, Angular and Microsoft SQL Server. Hands-on experience in Emergency Management, Disaster Management, Smart Energy and IoT-based applications. Experienced in developing REST APIs, backend services, Angular components, SQL queries/stored procedures, third-party integrations and real-time communication using WebSocket and FCM. Worked on WhatsApp Business integration for Namma112, including webhooks, message processing, media handling and status tracking. Also independently developed and deployed a business website on AWS.

EDUCATION

Sri Venkateswara College of Engineering (SVCE), Tirupati

B.Tech – Civil Engineering, CGPA: 8.5

MGM Junior College

Intermediate, CGPA: 10.0

Shanthiniketan E.M. School

SSC, CGPA: 9.8

EXPERIENCE

Associate Software Developer (Full Stack)

June 2024 – Present

TRINITY MOBILITY

Bengaluru, India

- Develop and maintain enterprise applications using Java, Spring Boot, Angular and SQL Server.
- Develop and maintain REST APIs and backend services for emergency management, disaster management and smart-city applications.
- Implement business logic, validations, exception handling and database operations.
- Write and optimize SQL queries and stored procedures for application workflows.
- Integrate third-party APIs and external services with backend applications.
- Develop and support a WhatsApp chatbot for Namma112, enabling automated citizen communication and message processing.
- Integrate WhatsApp Business API, including webhooks, text/media message handling and message-status tracking.
- Work on IoT/device integrations and real-time data processing.
- Analyze application logs and troubleshoot frontend, backend, database and integration issues.
- Participate in development, testing, deployment and production support.

PROJECTS

KaWaCHaM – Kerala Warnings, Crisis & Hazard Management System | Domain: Disaster Management

Technologies: Java, Spring Boot, Angular, SQL Server, REST APIs, Third-Party API Integrations

- Worked on the KaWaCHaM disaster-management product, supporting disaster-related data processing and application workflows.
- Developed and maintained backend services using Java and Spring Boot.
- Developed REST APIs for application workflows and external system integrations.
- Worked with SQL Server queries and stored procedures.
- Integrated external weather and forecast data into application workflows.
- Worked on weather and forecast integrations using Fyllo Actual Weather Data, Experiq Forecast and CWC-related APIs.

trinityRESPOND – Computer-Aided Dispatch (CAD) | Deployments: Namma112 & Maharashtra 112

Technologies: Java, Spring Boot, Angular, SQL Server, REST APIs, WebSocket, FCM

- Worked on trinityRESPOND, a Computer-Aided Dispatch and Emergency Response platform deployed for Namma112 and Maharashtra112.
- Developed backend services for incident creation, assignment, monitoring and dispatch workflows.
- Developed and maintained REST APIs using Java and Spring Boot.
- Implemented and supported real-time communication using WebSocket and FCM.
- Worked with SQL Server queries and stored procedures.
- Supported location and map-based application functionality.
- Performed production debugging, log analysis and root-cause analysis.

Namma112 – WhatsApp Chatbot Integration

- Worked on WhatsApp chatbot integration for Namma112 using WhatsApp Business API and trinityRESPOND backend.
- Developed chatbot workflows to receive citizen messages and provide automated responses.
- Processed incoming webhook events, including text, media and voice/audio messages.
- Implemented message delivery, read and status tracking.
- Integrated backend services to process information and return responses to citizens through WhatsApp.

trinityENERGY – Smart Energy & Centralized Lighting Management

Technologies: Java, Spring Boot, Angular, SQL Server, MQTT, REST APIs

- Worked on trinityENERGY, a Smart Energy Management solution for monitoring and managing lighting infrastructure.
- Developed backend services using Java and Spring Boot.
- Developed Angular interfaces for lighting monitoring and management.
- Worked on lighting schedules, device status and operational workflows.
- Worked on IoT/device integrations and real-time data processing.

LANS Lift – Business Website & AWS Deployment

Technologies: Angular, TypeScript, HTML5, CSS3, AWS, Git/GitHub

Website: lanslift.com

- Independently developed a responsive business website from requirement gathering through production deployment.
- Implemented business pages and enquiry/contact sections.
- Managed source code using Git and GitHub.
- Deployed and hosted the website on AWS.
- Handled production configuration, deployment and post-deployment support.

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript, TypeScript

Backend: Spring Boot, Microservices, REST APIs

Frontend: Angular, HTML5, CSS

Database: Microsoft SQL Server, Stored Procedures, SQL Query Optimization

Cloud & DevOps: AWS, Git, GitHub, Maven, Docker, Kubernetes

IoT & Real-Time: MQTT, WebSocket, Firebase Cloud Messaging (FCM), Apache Kafka

Integration: WhatsApp Business API, Webhooks, REST API Integration, Apache NiFi

Tools: Postman, JIRA, Eclipse, VS Code, Redis

CERTIFICATIONS

- Generative AI to AI Agent Masterclass for Software Engineers – Udemy, 2025 | [View Certificate](#)
